

1. Lists of specific jobs (including titles and responsibilities) of those QMUL staff whose work relates to the management, academic support, and professional services at these joint institutes.

Role title	Responsibilities
Queen Mary Engineering School, Northwestern Polytechnical University	
Director	Overall leadership of JEI
Lecturer	Programme delivery
Senior Lecturer	
Reader	
Operations Manager	Administrative/operational leadership
Administrator	Professional services support for programme delivery
Northwestern Polytechnical University-Queen Mary University of London Joint Research	
This is no longer active	
International School & Queen Mary School Hainan, Beijing University of Posts and Telecom	
Director	Overall leadership of JEI
Lecturer	Programme delivery
Operations Manager	Administrative/operational leadership
Administrator	Professional services support for programme delivery

2. Lists of specific education programmes, research projects, and research grants that are currently operational at these joint institutes and participated by QMUL students and staff or sponsored by the QMUL.

2.1 Specific education programmes

Queen Mary Engineering School, Northwestern Polytechnical University	
https://www.sems.qmul.ac.uk/china/	
BEng Materials Science & Engineering	
BEng Polymer Materials Science & Engineering	
Northwestern Polytechnical University-Queen Mary University of London Joint Research Institute	
None	
International School & Queen Mary School Hainan, Beijing University of Posts and Telecom	
BSc Information and Computational Science	
BSc Digital Media Technology	

2.2 Research projects

Queen Mary Engineering School, Northwestern Polytechnical University	
Final year undergraduate students undertake short research projects as part of their supervised studies – these take place in NPU laboratories, supported by NPU supervisors. QMUL provides these students with an advisor, who focuses on generic skills in the project, such as literature searching a project area, writing project reports and presentation skills	
Northwestern Polytechnical University-Queen Mary University of London Joint Research Institute	

No research projects. This is no longer active
International School & Queen Mary School Hainan, Beijing University of Posts and Telecom
No undergraduate student projects undertaken yet as programme only started in 2022/3

2.3 Research grants

Queen Mary Engineering School, Northwestern Polytechnical University
There are no current research grants operational that involve joint working at these institutes.
Northwestern Polytechnical University-Queen Mary University of London Joint Research Institute
This is no longer active
International School & Queen Mary School Hainan, Beijing University of Posts and Telecom
No staff on the Hainan JEI undertake research

3. From 2015 onwards, the annual number of UK Export Licence applications for all teaching, research, and funding activities at these joint institutes, their Open General Export Licence (OGEL) categories (if applicable), and the respective technical specifications.

We consider the number of UK Export Licence applications to be exempt from disclosure by virtue of section 43(2) of the Freedom of Information Act. This exempts information whose disclosure would, or would be likely to, prejudice the commercial interests of any legal person, that is, the commercial interests of QMUL and /or any other legal entity. QMUL's establishment of academic projects or partnerships or funding with external institutions or individuals have significant commercial sensitivity and disclosure would likely prejudice our commercial interests by putting QMUL in a more competitive market and a weaker negotiation position.

QMUL recognises the legitimate public interest in the transparency of higher education institutes. In balancing the public interest, we consider the greater benefit to the UK as a whole. Disclosing whether or not we have applied for any UK Export Licence and the details pertaining to this, could affect the free and fair competition of QMUL business in an open market. On balance we believe that the public interest in withholding the information outweighs the public interest in disclosing the information.
